Kidney Cancer UK Research Grants involving Animals

Kidney Cancer UK will only fund research involving animals when:

- The use of the animal model is appropriate and relevant to the research question
- There are no feasible alternatives and all reasonable efforts have been made to replace, reduce and refine the use of animals
- The work will be done in strict compliance with all applicable laws, regulations, guidance and ethics committee requirements, and welfare conditions meet the UK's high standards
- The research has a strong scientific rationale and robust study design which will help to deliver benefit for people affected by cancer

If we are to join the AMRC, we would endorse its statement on the use of animals in medical research. We would expect our funded researchers to adhere to the cross-funder guidance produced by the National Centre for the Replacement, Refinement and Reduction of Animals in Research (NC3Rs) outlined in:

- [Responsibility for the use of animals in bioscience research](#)
- [NC3Rs Guidelines: Primate Accommodation, Care and Use](#)
