

# Scanxiety

We surveyed patient in the UK on the delivery of scan results focusing on those undergoing monitoring following a full or partial kidney removal after a kidney cancer diagnosis. This survey was completed by 76 patients and ran online via social media planforms Facebook, twitter and Instagram from 22<sup>nd</sup> May to 18<sup>th</sup> June.

Any enquiries should be direct to Malcolm Packer at Kidney Cancer UK

## A few comments left anonymously from patients;

“Even though my treatment has finished the anxiety of having to wait so long for results is terrible. The fear of waiting to be told it’s not ok overtakes the good.”

“I haven’t had my first scan results yet (I’ve been waiting 6 weeks) and don’t know when I will receive them.”

“This time was an 8 week wait and was my 1st since surgery so I think it was a very long and stressful wait!”
