

The impact of COVID-19 on kidney cancer patients in the UK

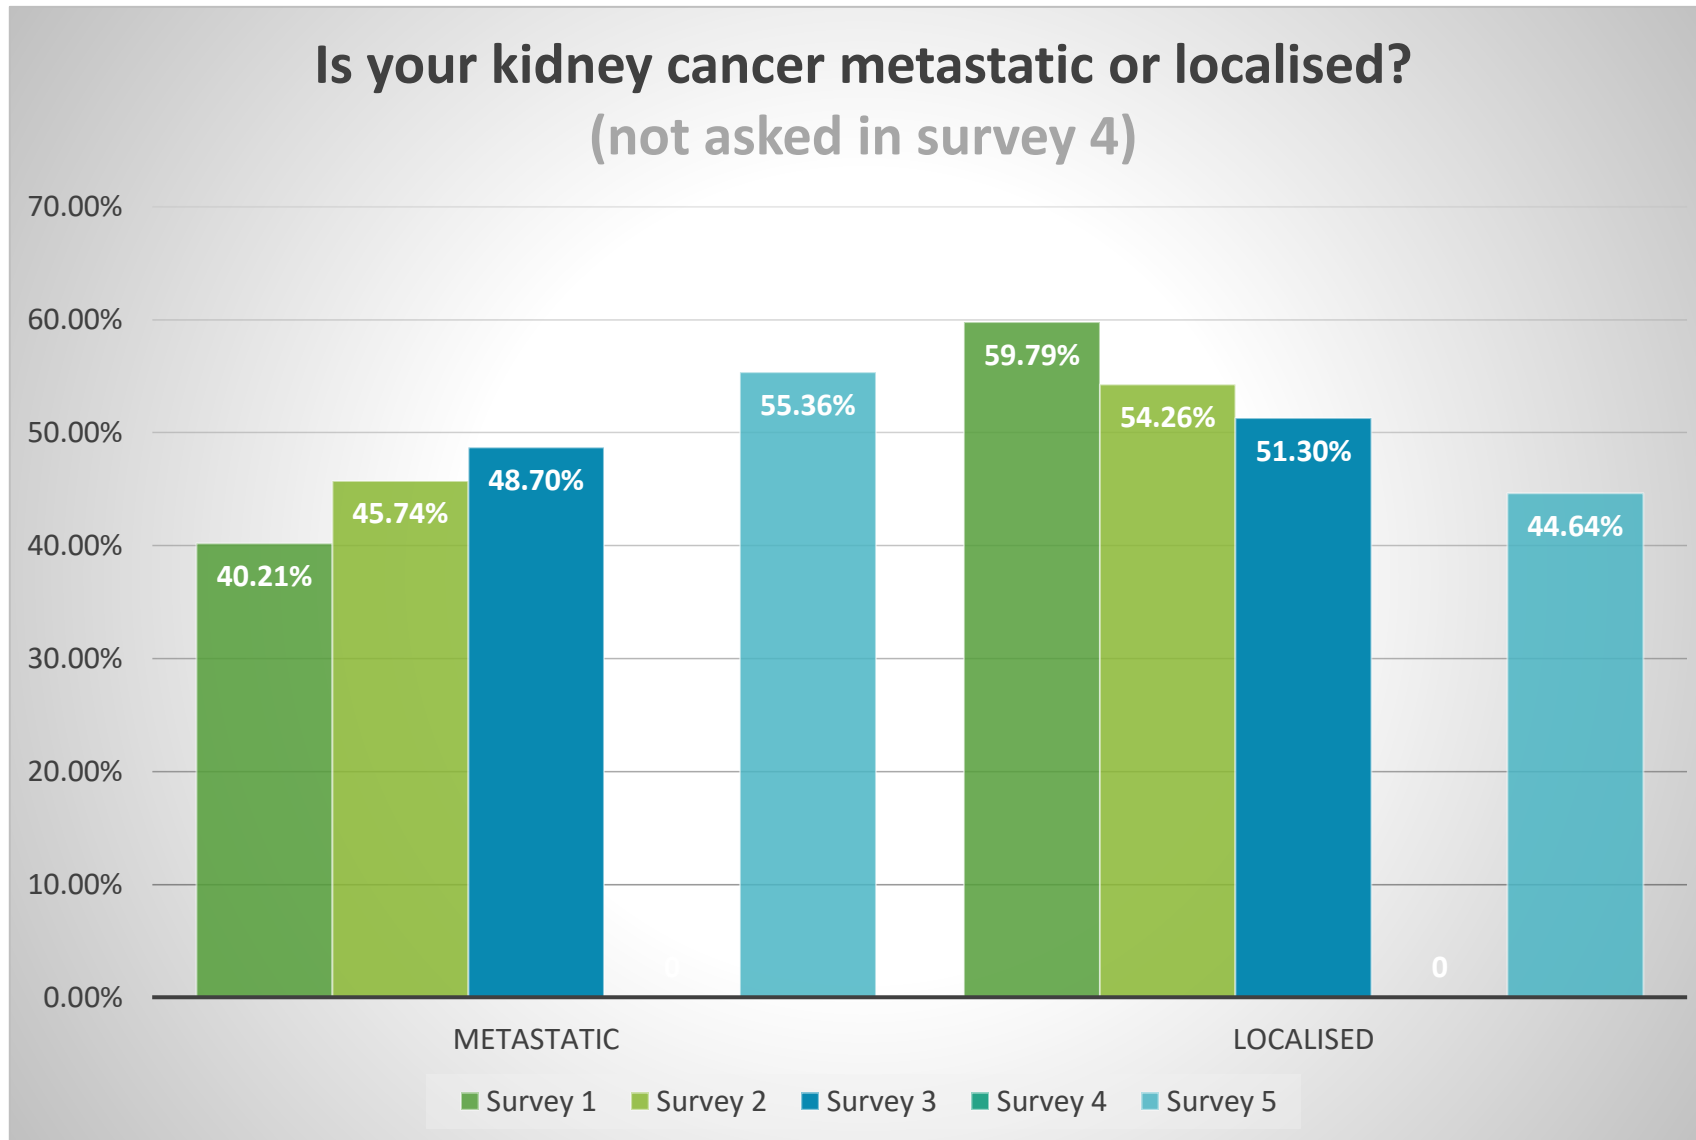

The information in this report is based on result of five survey's carried out by Kidney Cancer UK between 3rd April 2020 to end of January 2021 2020

- This report contains per centage data from four surveys asking mostly the same questions to kidney cancer patients relating to the affects of Covid-19 on their treatments
- The surveys ran from 3rd to 9th April (first) and 20th to 28th April (second) 19th July -2nd August (third) 2020 – 17th October to November 22nd (forth) – 18th to 31st January 2021
- The first survey received 99 completed surveys, the second, 95 the third 98 and forth (as part of our national wider kidney cancer survey) 255, the fifth 112.
- Participation was online via social media to Questionpro.com
